

Veradel® AG-330

polyethersulfone

Veradel® AG-330 is a 30% glass fiber reinforced grade of polyethersulfone (PESU). Adding glass fiber to polyethersulfone substantially increases the rigidity, tensile strength, creep resistance, dimensional stability and chemical resistance of the material, while maintaining most of its other basic characteristics. The combination of structural properties and cost effectiveness make this resin an attractive alternative to metals in many engineering applications.

Veradel® AG-330 PESU is a grayish material in its natural form and it can be readily colored.

This grade was formerly marketed as Radel® A PESU

- Black: Veradel® AG-330 BK 184
- Natural: Veradel® AG-330 NT

General

Material Status	• Commercial: Active	
Availability	• Africa & Middle East • Asia Pacific • Europe	• Latin America • North America
Filler / Reinforcement	• Glass Fiber, 30% Filler by Weight	
Features	• Acid Resistant • Chemical Resistant • Creep Resistant • Flame Retardant • Food Contact Acceptable • Good Adhesion • Good Dimensional Stability • Good Strength	• Good Thermal Stability • Good Toughness • High Heat Resistance • High Rigidity • High Tensile Strength • Hydrolysis Resistant • Medium Flow • Medium Molecular Weight
Uses	• Appliance Components • Appliances • Automotive Electronics • Batteries • Business Equipment • Electrical Parts • Electrical/Electronic Applications	• Food Service Applications • Industrial Applications • Metal Replacement • Microwave Cookware • Plumbing Parts • Valves/Valve Parts
Agency Ratings	• NSF STD-51 ¹	
RoHS Compliance	• RoHS Compliant	
Appearance	• Black • Colors Available	• Natural Color
Forms	• Pellets	
Processing Method	• Injection Molding	

Physical
